

Project Design Phase-I
Proposed Solution

Date	5 November 2022
Team ID	PNT2022TMID12465
Project Name	Project – News Tracker Application
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The majority of people dislike carrying around a newspaper. Some people want to just receive updates on the topics they are interested in. Due to their hectic schedules, users cannot access the most recent news. and a great deal of bogus news is circulated. An app for sharing news aims to make it simpler for users to access pertinent news and to make it evident that the material is accurate and was acquired from reliable sources.
2.	Idea / Solution description	We shall be aware of the user's interests and disinterests in order to provide them with the pertinent content they require. By offering the news feed feature, which contains brief, rapid news that saves the user time. Users should be able to tailor their region of interest and receive news whenever they want thanks to an application that is currently being developed. It gathers news from all the trustworthy sources and divides it into several categories for the greatest user experience.
3.	Novelty / Uniqueness	1.Rather than reading all the news, a user can read the news only in the fields in which they are interested. 2.Designing a user experience that is appealing to clients and delivering significant news headlines with more information.
4.	Social Impact / Customer Satisfaction	Providing customers with a user interface that is appealing and important News Headlines with more information. Additionally, because we deliver succinct news, users save time. Regular app users will become more mindful of their surroundings. Keep individuals well-informed and assist them in quickly consuming trustworthy information.
5.	Business Model (Revenue Model)	We should include advertisements in the application so that we can receive funding from companies that sponsor the ads. Additional advertising could annoy the user.

6.	Scalability of the Solution	<p>One of the criteria for measuring how well cloud services are used by enterprises is scalability.</p> <p>By enhancing resource allocation and adapting to changing needs without compromising the effectiveness or calibre of our internal operations and customer service, cloud scalability will help to grow the user base. delivering timely, accurate news while fostering strong bonds with your clients.</p>
